Olsson's Mineral Health Essentials improves mineral delivery to bacterial flora, via better adsorption and availability of minerals. Olsson's technical team have developed technology that allows the minerals to be absorbed with cationic effect. Cationic nutrients are known to be approximately 30% more available to the ruminant.

Mineral Health Essentials also increases habitat for bacterial flora in the rumen. A reduction in green season scours and general improved health will be evident when supplementing with Mineral Health Essentials.

DIRECTIONS FOR USE

Feeding Instructions:

Use in accordance with the Olsson Indicator system.

Sheep/Goats: 5-10g per head per day

Cattle: 50-100g per head per day

Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies.

Place out sufficient blocks to avoid overcrowding of stock. Replace immediately when consumed.

Avoid contact with skin and eyes.

Storage Instructions:

Store out of direct sunlight and under cover. Edible carton and packaging.
