

MOLYBITE

**18 &
34kg**

A bentonite & molybdenum supplement for livestock grazing areas infested with liver toxic plants such as heliotrope

TYPICAL ANALYSIS

Total Protein Equivalents	7%
Molasses	7%
Salt (NaCl)	31%
Bentonite	33%

MACRO INGREDIENTS

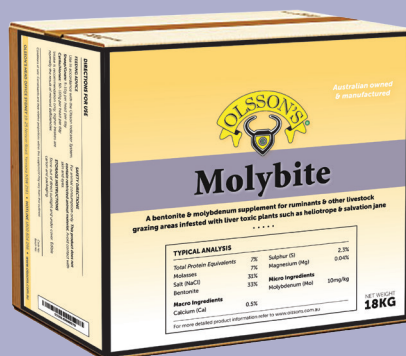

Calcium (Ca)	0.5%
Sulphur (S)	2.3%
Magnesium (Mg)	0.04%

MICRO INGREDIENTS

Molybdenum (Mo)	10mg/kg
-----------------	---------

FOR ANIMAL TREATMENT ONLY.

**THIS PRODUCT DOES NOT CONTAIN
RESTRICTED ANIMAL MATERIAL.**

When molybdenum is combined with bentonite in the form of a convenient, cost-effective pressed block like Olsson's Molybite, the effects of excess copper levels may be ameliorated. In areas infested with liver toxic plants, such as Heliotrope or Patterson's Curse (Salvation Jane), it is recommended that Molybite is supplied on an ad-lib basis all year round and in Spring especially when sheep are grazing clover pastures or pastures containing clover plants.

Molybdenum counteracts the effects of excess copper taken in by liver cells which have been damaged by these liver-toxic plants.

DIRECTIONS FOR USE

Feeding Instructions:

Use in accordance with the Olsson Indicator system.

Sheep/Goats: 5-10g per head per day

Cattle: 50-100g per head per day

Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies.

Remove outer carton and plastic cover and place near water troughs, dams and stock camps. Place out sufficient blocks to avoid overcrowding of stock. Replace immediately when consumed.

Avoid contact with skin and eyes.

Storage Instructions:

Store out of direct sunlight and under cover. Edible carton and packaging.
