

# PROTEIN PLUS

**20kg  
bag**

**A loose mix feed supplement with  
85% protein**

## TYPICAL ANALYSIS

Min. Crude Protein	14%
Min. Equivalent Crude Protein	71%
Calcium (Ca)	7%
Salt (NaCl)	12.13%
Crude Fat	1.0%
Crude Fibre	8.0%
<b>Urea</b>	<b>25%</b>
Sulphur (S)	1.5%
Copper (Cu)	125mg/kg
Cobalt (Co)	15mg/kg
Zinc (Zn)	250mg/kg
Manganese (Mn)	225mg/kg
Vitamin A	62,500iu/kg
Vitamin E	125mg/kg
Fluoride	0.02%
Iodine (I)	15mg/kg
Monesin Sodium	500mg/kg

**FOR ANIMAL TREATMENT ONLY.**

**THIS PRODUCT DOES NOT CONTAIN  
RESTRICTED ANIMAL MATERIAL.**

Olsson's Protein Plus is a concentrated loose mix supplement, supplying protein as well as the vitamins and minerals that are lacking in some grain rations.

When protein requirements are not met by the diet, Protein Plus in the correct amounts will increase the protein levels by 2.6%

The addition of Rumensin (monesin) further improves feed efficiency by about 10%. This will result in animals better utilising the nutrients in their diet, as well as faster weight increases and better feed conversion to meat.

When you add Protein Plus to your livestock feed ration as directed, you can be confident that the feed is nutritionally balanced and complete.

## DIRECTIONS FOR USE

### Feeding Instructions:

Olsson's Protein Plus should be mixed with the grain and roughage ration at the rate of 40kg to each tonne, i.e. 4% of the ration. Introduce cattle to grain gradually. Sodium Bentonite at 20kg/tonne reduces the risk of acidosis. The concentrate and feed should be mixed well.

### Withholding Period: Nil

Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies.

Avoid contact with skin and eyes.

**Warning: Products containing urea can be toxic to livestock. Please ensure proper farm management practices are employed.**

### Storage Instructions:

Store out of direct sunlight and under cover. Store at room temperature (below 30°C).
